

cornerstone
DECORATION
ENGINEERING ESTABLISHMENT

introduction

Corner Stone Decoration Engineering Establishment was founded in Abu Dhabi, United Arab Emirates (UAE) in 2002.

With the vast trade opportunities in the construction industry, we positioned Corner Stone as an outright decorative engineering services provider, specializing in plastering and painting works.

Our team of innovative, efficient, and passionate professionals are the experts in the field. We provide our clients with unequaled design options and plan ideas that are cost-effective to execute.

Through time and our adherence in delivering the highest quality of services in all our projects, we have gained the trusts of both government and private entities in the UAE. This helps us to expand our business and move closer to our vision of bringing our superior quality standards of workmanship upward in the UAE's construction market.

MISSION

We are commissioned to unceasingly deliver the highest quality of services within the requirements and budget of our clients. Through exploring new engineering methods and technologies and by using the top selection of materials, we commit to exceed our clients' expectations and provide them with the best results.

VISION

We envision Corner Stone to be the leading contractor of choice in the industry by honing more our teams' skills in their respective fields in decorative engineering. We aim to deliver exceptional and cost-efficient end-results of our projects to our clients.

our specialty

design services

With our in-house design team, we personally deal with our clients throughout the design conceptualization stage and the actual rendering of designs. This is to give them a virtual walkthrough of the design ideas and to allow them to visualize the project outcome. As we create the designs, we let our clients give their inputs until we meet their satisfaction.

plastering

Plastering is one of our expertise. We execute various plastering methods – from the traditional manual cement plaster application to the latest spray plastering. These methods provide walls and ceilings of with protective coating.

More than the protection it provides, plastering is also done for molding and casting decorative foundations. We do a variety of texture finishes to suit each project's unique requirement – from smooth finishing to light to heavy dashes, from California and Santa Barbara finishing to Spanish and English, from fine to heavy sand finish stucco.

painting

Corner Stone's proficiency in painting has been proven to be one of those in the industry that deliver excellent quality in coating outputs, may it be water or oil-based, epoxy or acrylic type.

We assure that we only use the type of paint that is apt on the kind of surfaces and materials to be coated. This is to guarantee our clients with the best results that is long-lasting.

paving

Pavements have evolved from being mere walkways into decorative pathways. With our skilled and well-experienced masons and engineering team, we install paving materials with precision that are according to the designs and specifications and are guaranteed to withstand extreme weather conditions.

steel work

Corner Stone designs, fabricates, and installs various steel products such as steel waiting sheds, ramps, handrails, gates, steel flag poles, steel car parking sheds, steel statues, etc.

As we have our own steel fabrication facilities, our prices are surely lower than of our direct competitors in the market.

civil work

We build public utilities and recreational infrastructures such as public restrooms, bus stops, and playgrounds. Water fountains is also one of the civil works we design to fabricate and build.

gypsum board

Gypsum board or commonly known as drywall is a panel product that has been broadly used for walls and ceilings. At Corner Stone, we produce a variety of innovative and creative designs and installations for Gypsum boards for decorative and renovation options.

We fabricate and install regular/non-fire rated and fire-rated, shaft liner drywalls, which are mold and moisture resistant for factory-built houses paneling and ceiling installation system.

safety road tools

In addition to our lineup of products and services as a contractor, Corner Stone also supplies and installs concrete and plastic barriers, plastic road cones, and permanent and temporary road markers or reflectors for road safety.

These products are important and useful to outline travel lanes and enhance roadway markings especially if there are ongoing construction works. The markers we provide are highly effective and have long-lasting visibility especially at night and during rainy weather.
